

# Quality Policy

of HB Hunte Engineering GmbH

**Basic Norm:**

**DIN EN ISO 9001:2015**

**Section:**

**Standard Chapter: 5.2**

With the introduction of a quality management system according to DIN EN ISO 9001:2015, we want to further expand our high-quality standards.

The DIN EN ISO 9001:2015 offers us a framework in which, together with our employees, we shape our future positively for our customers, suppliers and all partners.

Each and every one of us contributes to the implementation of the quality management system, which is lived and developed for the benefit of our community.

In order to achieve this, it will be necessary that we constantly improve our work as well as the processes in our organization.

We are aware that only our customers can secure the continued existence of HB Hunte Engineering GmbH. In this respect it is our duty and commitment to fully meet the expectations of our customers and, if possible, to outperform our services. Therefore, we strive to satisfy our customers without exception.

This also means that we can offer our services at competitive prices; another reason to further optimize our processes. Again, our quality management system will be a helpful tool.

At the same time, we undertake to comply with all official and legal requirements as well as the requirements of DIN ISO 9001:2015.

In order to be successful in the future, it is necessary to be able to offer our customers innovative solutions. We will only succeed if we adapt our know-how to the current state of development of our disciplines. In this respect, we will pay even more attention to the training and further education of our employees in the future.

Our task is to open new markets, to define innovative products and to acquire special knowledge in order to advance the company's specialization.

An essential guarantor of a successful company are satisfied employees. It is part of this quality policy to enable each and every member of our team to have a job that meets their skills and needs, promotes development and is designed to foster job satisfaction.

In order to be certified in accordance with DIN EN ISO 9001:2015, the required funds will be made available and the working time that is needed for the implementation and maintenance of the quality management system is scheduled.
